

# Stockwell Academy App Update

<https://app.piota.co.uk/stockwellacademy/>

We have had to change the way our school app is downloaded. We now have to search for Piota in the app store, or use the link above. Once downloaded then search in the app for Stockwell Academy.

Stockwell App is the most direct way for our school to provide you with information. You can read it there and then, browse it later, respond if necessary, or simply use it as a reference source when out and about. All straight from your phone, making everyone's lives simpler.

Push notifications or alerts from our school will reach you as quickly as a text but can contain much richer information: video, pictures and documents as well as words. Choose whichever groups you most want to hear from to ensure you receive relevant information, reminders, announcements, forms, newsletters, online safety information and much more. You are in control so there's no more being bombarded with everything or feeling left out of the loop.

The Events Calendar is one of users' favourite features. The Add to Calendar feature allows you to add events to your personal calendar.

Information is added regularly to keep you up to date with useful facts about school life.

Forms and surveys can be accessed directly on the app in 10 seconds if you're in a hurry or at more length if not. Snap surveys are shorter and more to the point than online ones and equally easy to fill out and send back.
