

HANDS -----FACE ----SPACE

Monday 4th January 2021

Dear Parents / Carers,

Happy New Year! I hope that you and your families have had a safe and peaceful Christmas holiday time?

Tomorrow the school opens again for all children for the start of the spring 2021 term. We are all excited to get back to work and to see the children again and to welcome them back into class.

Timings for drop off and pick up will remain the same as they were last term, as will the drop off and pick up points.

Thank you for your continued patience and understanding. I appreciate that these are difficult days for our community and that there is a large amount of uncertainty for us all. Please be assured that our Covid 19 risk assessment is being strictly followed by staff and children. It has been updated today and the updated version is currently on our school website

Last term I asked that, if you were medically able, you wore face coverings / masks upon entering the school site, as you drop off and collect your children. Thank you to all of you who have been able to support the school's request. It is another way of trying to minimise the spread of Covid 19 within our community and follows government guidelines during these days of national restrictions.

As we return to school I feel it is important to remind ourselves of the national guidance that should be observed whilst on the school site, in order to keep protecting each other.

Hands – be really conscious about remembering to keep hands clean

Face - wear a mask when on the site.

Space – please keep 2 metres away from people who are not in your support bubble.

It is really appreciated the way parents come onto the school site and observe the 2-metre rule. Can I also request that only one adult brings their child into school, where possible, to minimise the number of people entering the school site

The Hands, Face, Space rules are there to keep us all safe.

Thank you. See you tomorrow.

Mr Coulter

We must keep on protecting each other.
